Overview

- Showing permission rationale dialog

- Handle permission denials

Code Challenge Solution

If User Denies The Permission

- Explain the user why the permission is required

- If user selected "Don't Ask Again", open settings to get permission

Designing an Explanation Dialog

- Showing the user why the permission is essential for the specific app feature.

Don't Ask Again

- In case of a permanent denial of the permission we can disable the feature and open the settings.

Code Challenge

- Request Notification Permission for Home Screen

Summary

- Designed Explanation Dialog for the User

- Handled permanent permission denial

- Code Challenge

Requesting Multiple Permissions
