in/probelalkhan

Overview

- Getting Started

- Exploring Permissions Fundamentals

- Declare and Request App Permissions

- Handling Permission Denials

- Requesting Multiple Permissions

- App Permissions Best Practices

Prerequisites

- Kotlin Programming Language

- Android app development fundamentals

- Familiar with using Android Studio and emulator

- Building UI with Jetpack Compose

Android Permissions

- App permissions help support user privacy by protecting access to the following:
  - Restricted data, such as system state and user's contact information
  - Restricted actions, such as retrieving user's location

What You Will build?
